Cancer is often curable.

The fear of cancer is often fatal.

If you're afraid of cancer...you're not alone. But some people are so afraid that they won't go to the doctor when they suspect something's wrong.

They're afraid the doctor might "find something." This kind of fear can prevent them from discovering cancer in the early stages when it is most often curable.

These people run the risk of letting cancer scare them to death.

Outdoors & Travel

by E. L. "Buck" Rogers

We were sitting around the local pub reminiscing about girls and talking about fishing when this feller came in with an "Explorer" patch on his jacket.

Now, Elvis Presley T shirts, Six Flag stickers, and patches commemorating everything from motor oil to plastic worms are common these days. But, this distinctive leather patch with the world "Explorer" on it kinda caught our eye. After all, a man with a patch like that has to have been some place and done something.

"Where you been?" one of our group asked.

"Down in the Amazon," was the answer.

"Where did ya get that patch?" I queried.

"From Braniff," this feller replied. "I'm an Explorer member of the Braniff Outdoor Council."

Sam Smithers introduced himself, then, and got the floor by ordering another round of coffee. He told me all about this new organization and how others could become members.

According to Sam, this Dallas-based airline has more than a passing interest in folks like us who spend our leisure moments trying to catch fish or freezing our fannies off in a duck blind. So, they've created an organization called the Braniff Outdoor Council, and they've made it available to everyone who's done a little traveling in search of outdoor adventure.

Membership is not complicated. There is no initial membership fee and no annual dues. The organization has no by-laws, nor is a member required to serve on a committee or commit himself to some grand cause.

Each member of the Braniff Outdoor Council receives a leather Explorer patch for his jacket or fishing shirt. He receives a free copy of the organization's *Outdoor Adventures* each year. An informative newsletter comes to him each three months. He will be invited to join special group tours which are reserved exclusively for Council members. An attractive wall map of the Americas is available to him at cost. So are destination pins which are stuck in the map to help each member keep track of his travels and to help impress visitors to his home or office.

As I mentioned, membership is free, but a guy or gal has to do a little traveling to be included. Destinations which qualify are Alaska, Hawaii, Mexico, and most of the other countries which lie south of our border.

If you think you qualify, or if you would like more information on this exclusive organization for gad-about sportsmen, write for a color folder on the subject to the Braniff Outdoor Council, Suite 201, Outdoors Bldg., Columbia, Missouri 65201.

YOUR GARDEN

Ways To Deal With Weeds

Weed killers act in various ways. A selective weed killer will affect some kinds of plants but not others. Non-selectives kill all or nearly all plants with which they come in contact.

Pre-emergence chemicals prevent the weed seed from sprouting for four to six weeks and are safe to use around many other plants.

WEEDS LIKE THESE don't like weed killers or rakes.

Post-emergence weed killers, the most widely used type, may be selective or nonselective. A wide-spectrum weed killer can be used to clear an entire area that has no desirable plants. After the weeds are killed, destroy all dead material, then use a residual control to keep the site free of weeds.

A new authority on garden care, the 672-page *Reader's Digest-Illustrated Guide to Gardening*, an easy-to-read book available at bookstores, points out that modern weed killers can control most garden weeds but can also harm nearby plants. A few minute's work with a hoe or a rake on a dry day, repeated as often as new weeds appear, is often a safer way of dealing with weeds growing near ornamental plants. Close mowing of grass for two consecutive seasons will usually eliminate most perennial weeds.

By and large, whether you use chemical or cultural methods, where there are weeds, there are usually ways to get rid of them.

SPORTS

BY BILLY CONNER

RAIDERETTE CO-CAPTAINS, Annette Carter, left and Vanessa Smith have been chosen to lead the A.C.H.S. 1979 Girls' Softball Team.

Annette, in her third year, lettered first two years, made honorable mention All-District last year, compiled .376 batting average, scoring 23 runs, had 8 doubles, 4 home runs and .942 fielding average. Also had 21 RBI and 12 stolen bases.

Vanessa, in her fourth year, lettered two years, will start at 2B but can play 1B and OF. Last year she batted .390 with 5 triples, 13 RBI, 22 runs and 6 doubles.

Raiderettes Expect Good Season

The Raiderette softball team, under Coach Mary Tolley, expects to improve on last years 7 - 8 record and the girls are anxious to get started.

With the loss of four starters from the 1978 team fans will be seeing some first timers in the line up for A.C.H.S., however there will be seven returning lettermen - five of them starters last year. Connie Murray (OF), Roxie Martin (SS), Bernetta Moore (OF) and Roni Franklin (2B,P) were lost to graduation.

Coach Tolley looks for Amherst, Gretna and Rustburg to have an edge due to their pitching, however Nelson, Jefferson Forest and William Campbell should be tough. As for team offense seems to be a weakness now, but this will improve as the season progresses. Raiderettes will get their batting eye as they face faster pitchers.

Probable starters include: Seniors Susan Godsey and Vanessa Smith, Juniors Johnna Belter, Annette Carter, Sherri Repass, Angie Richardson and Debbie Smith, Sophomore Susan Handy and Karen Johnson.

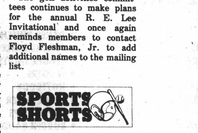
Season opens March 28th against Gretna (Seminole District Champions 1978). Home games will be played at the High School field.

Golfers Needed For Tournament

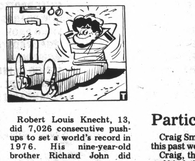
Additional golfers are needed to play in the Captain's Choice Golf Tournament scheduled for March 31 and April 1. To date about 45 members have signed up. This is strictly a fun tournament and members who have not participated in this event before are in for a treat. Contact the pro shop for details.

The golf activities committee continues to make plans for the annual R. E. Lee Invitational and once again reminds members to contact Floyd Fleshman, Jr. to add additional names to the mailing list.

SPORTS SHORTS



Robert Louis Knecht, 13, did 7,026 consecutive push-ups to set a world's record in 1976. His nine-year-old brother Richard John did 25,222 sit-ups for the world record in 1972.



Many people still believe athletes use up their muscle tissue during strenuous exercise, but actually, according to nutrition experts reporting in Foremost Foods' *Professional Nutritionist*, they may increase the size of their muscles as long as they also increase slightly the amount of protein they eat.

Craig Smith

Participated In Shamrock Marathon

Craig Smith ran in the Shamrock Marathon at Virginia Beach this past week end on March 17.

Craig, the son of Mr. and Mrs. Calvin Smith of Appomattox, and his father left for Virginia Beach Friday so that Craig could get familiar with the course of 26 miles.

The race started at 10 a.m. Saturday and half way through the race, Craig had to stop to administer to his "blisters" on his feet.

About one-half hour later, Craig ran for a while in his socks, then stopped again and put his shoes back on.

Out of a field of 2,000 runners, Craig came in 952 with a time of 4 hours and 20 minutes.

Next month he will run in a marathon in West Virginia.

County Youth Assoc. To Meet March 6

HOUSE HUNTING HINTS

The Heating Plan

That new house may look like your dream home, but before you sign on the dotted line, come down to earth and make sure you're getting good value for your money.

Electricity is the only practical alternative method of heating homes and the least expensive way to heat with electricity is with a heat pump. And the heat pump provides air conditioning in the summer as well.

One thing it's important to look into is the heating and cooling system. Many experts on home climate conditioning are suggesting that people consider heat pumps as an effective and economical means of both heating and cooling a home.

Heat pumps have been around since 1932 when Westinghouse installed the first residential one, and within the past 10 years the design has been improved significantly. What heat pumps like Westinghouse's Hi/Re/Li do is move heat contained in cold air into a home to heat it—and by reverse action move hot air out in warm weather.

Many people who have installed heat pumps report that it was a very good buy. Although it may cost $200 to $300 more to buy and install a heat pump than a gas furnace and air conditioning system, they report that the annual cost savings soon make up the difference. So when buying a home, an apt inquiry is whether a heat pump is a good possibility. Here are four tips on other aspects of home buying that should concern the aware purchaser.

KEEP A COOL HEAD—Inquire about the heating and cooling system.

1. Check out the community. Is it pleasant and healthful? Look at projected land use maps to make sure the basic layout won't be changing in the near future.

2. Examine the house closely. Check the kind and quality of materials—look for telltale waves or dips in wood that could mean warping. Does the home show signs of settling or faulty construction?

3. When closing the sale, make certain you get an accurate legal description of the property on the deed.

4. After the sale, check maintenance instructions and guarantees on all the appliances.
